

The London Paediatric Orthopaedic Revision Course

London, 17th October 2008

The first Paediatric course we have organised took place on 17th October at the Royal Institute of British Architects in London. This well-attended, one-day intensive course was aimed at SpRs and STrs preparing for the FRCS (Orth) examination. All relevant paediatric orthopaedic topics were covered in lecture-based tutorials, which were focused, exam-directed, evidence-based and interactive. The course convenors were consultant surgeons Manoj Ramachandran, Matthew Barry and Mark Paterson of St Bartholomew's and The London Hospitals.
